John Tyler Community College, Chester, VA August 2020 - May 2021
Associate of Science in Computer Science
4.0 GPA Dean's List (Fall 2020) Honor's List (Spring 2021)

Courses Completed

- Algorithm Analysis with Advanced Data Structures •Operating Systems •Fundamentals of Software Engineering
- User Interface Design • Databases •Software as a Service •Natural Language Processing

Technical Skills: Proficient in •Java •Python •C •SQL •PHP •JavaScript •HTML •CSS and various frameworks

Academic Projects

Voice Recording Web Application for infants in NICU March 2022-

- As a member of a two-person group and working alongside VCU Health's NICU department, developed a web application to allow parents to send voice recordings for their infants in the NICU using PHP, Javascript, HTML, CSS, and Python.
- Allowed parents communicate with their infants while they are not able to be present in the NICU.

Customer Information Database January 2022

- Designed an automotive repair shop database to help automotive shops keep a database of customer and vehicle information as well as work done on their vehicles using MySQL, PHP, Javascript.
- Will help smaller shops improve shop efficiency, improve organization, and allow for appointment scheduling

Fitness App, Software Engineering August 2021

- As a member of a four-person team, designed a fitness application for Android using Java that allows users to track calories and set and progress goals.
- Implemented helpful features to assist users searching for a more active lifestyle

Other Work Experience

Mechanic, Moreno's Auto Repair, LLC, Richmond, VA 23234 January 2016- June 2021

- Diagnosed and repaired automobiles according to customer's concerns

Student Organizations
